	<b>Leaf App</b>
<b>Other Information</b>	This sport of 'Francee' has almost completed its color change to the usual coloring of the parent, Francee. It emerges compleely white in the spring. Turns yellow w/ thin white margin beforebecoming green w/white margin for the rest of the season. Wh ite streaking noted on later emerging green leaves before they turn completely green. Discovered in a batch of tissue cultures East Multinlier but appear s to be smaller than parent plant Data from H. Philline
